Plastic

Convenient, versatile, lightweight and allows flexibility of design, all characteristics of the modern day miracle we know as plastic. Plastic materials have worked their way into every aspect of our lives and will continue to do so even more into the future as chemists invent new applications.

Although plastic has many advantages, the main set back of the material is its vulnerabilities when it comes to cleaning and maintaining. This is particularly relevant when it comes to clear plastics where fine surface scratching and dirt accumulation cause a breakdown in clarity.

Normal cleaning products can damage plastic, reducing its lifespan considerably and adding to replacement cost if the cleaners used, contain the wrong chemicals.

Until recently there has not been an effective product to satisfy the requirements of maintaining the delicate surfaces of plastics. Often other cleaners have been difficult to use or simply inefficient in the long term.

VuPlex™

VuPlex™ was designed for use within the demanding Aviation industry and delivers a fast, safe, and effective solution to plastic maintenance.

The ingredients in VuPlex™ have been specifically selected and tested to deliver fast quality results with the minimum of effort and fuss.

Some cleaners use abrasives to remove dirt and scratches. This not only introduces more scratches to the surface but over time weakens the plastic through constant plastic removal. VuPlex™ works in reverse to this process by penetrating the dirt and grime in the surface and adding a fine layer of filling material that leaves the surface protected and adds a lustrous finish to clear and coloured plastics and makes plastic paints gleam like new.

A preventative as much as a cure!

VuPlex™ is a preventative as much as a cure. If VuPlex™ is applied when plastic is new, it protects the surface from premature aging. If the surface is already damaged with fine scratches and in-ground grime, VuPlex™ will restore the surface and clarity, leaving a finish that is polished and protected.

How it works.

The product works using five functions in one quick action.

1. It cleans using safe ingredients that won't damage plastic surfaces.
2. It applies a fine coating of wax that gives the surface protection from micro scratching.
3. The wax acts as a barrier against water (hydrophobic) and other atmospheric conditions that cause aging and a break down of clarity.
4. Static that is built up in the plastic surface and attracts other abrasive material such as dust, is controlled by VuPlex's™ anti-static properties.
5. VuPlex™ polishes to a high shine and restores the lustre and "new look" to the surface. The finish is not sticky or greasy and can be achieved in mere seconds.

What can I use VuPlex™ on?

There are almost limitless applications for VuPlex™. Although VuPlex™ is designed for a specific purpose (clear and coloured plastics) VuPlex™ can be used on polished metals, painted and glass surfaces.

As you can see, VuPlex™ has many uses. Take a can home today and try it for yourself!

Try VuPlex™ on...

AIRCRAFT

Windshields and Canopies
Instrument Facias
Leading wing edges

BOATS

Acrylic and Polycarbonate
Windscreens
Clear Vinyl Windows etc.
Clears and Bimini Top

Windows

Instrument Panels
Goggles
Jet Skis

MOTORCYCLE

Helmet Visors
Polycarbonate Windshields
Painted Surfaces
Polished Metals

AUTOMOTIVE

Window Tinting
Dashboard & Interior Trim
Stone-Guards and
Headlight Protectors
Clear coated alloy wheels

CARAVANS

Acrylic Windows
Vinyl Windows
Bench Tops

CLEAR OR COLOURED ACRYLICS

Aquariums
Windows
Spas

Storm Windows
Outdoor Vinyl Blinds

AROUND THE HOME / OFFICE

DVD's & CD's
Outdoor PVC Blinds
Stainless Steel appliances
Granite bench tops
